

LEARNING ENHANCEMENT ADVANCED PROGRAM

BRAIN INTEGRATION 1

Take a **QUANTUM LEAP** in *Understanding and Correcting* Specific Learning Difficulties such as Dyslexia and Attention Deficit Disorder!

The Brain Integration Program – LEAP - is a 5 part Learning Experience (developed by Dr Charles Krebs) that will change many people's lives by disclosing the real "Cause" of Specific Learning Difficulties and providing a Step-by-Step Approach to their Resolution. Based on the hierarchy of brain function, LEAP has been recommended by psychologists, teachers and other health care professionals because it consistently produces improvements measurable by standard psychological tests.

LEAP provides a powerful way to set up the body bio computer for correction using Applied Physiology formatting from the Anatomy and Physiology of the Brain course. LEAP teaches you HOW to correct learning problems, WHAT you need to correct, and the ORDER the corrections need to be made. Because LEAP is based upon the hierarchy of brain function involved in the learning process, each step in LEAP has a reason both for its exact location in the Program and its inclusion in the Program. Both theoretical and clinical considerations will be covered in detail with regard to each assessment and correction procedure presented. Once the relevant imbalance is on the bio computer, each practitioner will then correct it with the skills they have available.

Brain Integration 1a: Includes an introduction to Brain structure and function,

- ◆ Gestalt and Logic "Lead" functions,
- ◆ the Amygdala Fear/Pain Control Circuit (our Survival Circuits!),
- ◆ Deep Level Switching - the cause of delayed language development and Psychological Reversals and Conflicts,
- ◆ Blocked Corpus Callosum and Commissural Pathways and other Integrative Pathways that can cause the loss of Brain Integration and affect our ability to **resolve** challenges rather than **react** to them.
- ◆ Celestial Circuit – under stress, we sometimes split off or dissociate so it can be difficult to locate imbalances. Aligns all of our energy structures so we balance to a core stable energy system.

Prerequisites: Applied Physiology Hologram Series, Energetic Kinesiology for Professionals or Touch for Health 1-4 or other Kinesiology courses that will give you strong corrective techniques. LEAP teaches you how to access, format and work with Specific Learning dysfunction but requires you to utilise your repertoire of skills for correction.

Email Janet@leaptolife.com.au to find out dates when the course will next be presented.
